October 2022 Funding Opportunities

As a member of the [Food Waste Funder Circle](#), you will receive this monthly Deal Flow Report, which provides an overview of for-profit and nonprofit companies in the food waste sector that are currently seeking funding. **This month's report includes 57 for-profit companies, 65 nonprofit organizations, 1 research institute, and a total of USD 393 - 402M in funding opportunities** (this information comes from self-reported data from solution providers who filled out our funding survey). The report also includes 10 new deals since our September report, which are **highlighted in green** in the summary table.

We're happy to provide any warm introductions to these solution providers if desired, otherwise we've included contact information for each company, so please feel free to reach out to them directly -- if you do make a connection as a result of this report, please keep us in the loop (sarah.munger@refed.org) so we know how valuable you find this report.

How to Read this Report:

- The first section provides a summary of each organization, and the subsequent pages provide more detailed information on each organization.
- The organization links in the overview table bring you to each respective organization's section of the report.
- Organizations are listed in alphabetical order within their **Key Action Area**.
- The **Key Action Areas** are a framework developed by ReFED that demonstrates the seven areas where the food system must focus its efforts to make a meaningful reduction in food waste across the food supply chain. Knowing the Key Action Areas can be helpful for funders to understand where an organization sits. You can learn more about ReFED's key action areas by referring to [Appendix A](#) at the end of the report and visiting ReFED's website [here](#).
- We've indicated which action areas each company addresses in the table of contents using the following icons:

Note: The deals provided in this report are shared for informational purposes only. ReFED, Inc. is not a registered investment advisor and has not conducted any form of investment or other diligence on any of the organizations listed within.

Overview of Active Funding Opportunities

Page	ReFED Action Area	Organization	Org Type	Annual Revenue or Budget (USD) *	Ask Amount (USD)	Capital Type	Maturity Stage **
14.	 Optimize the Harvest	ANINA Culinary Art	For-profit	N/A	7M	Equity	Growth Stage

Organization Profiles

Rishon Le Zion, Israel • Founded: 2020 • Time on Report: 2 Months
Contact: Anat Natan \ Esti Brantz, CEO \ Head of Impact, anat@anina.com/esti@anina.com

[ANINA Culinary Art](#) creates exciting eating experiences from food waste: they redesign imperfect produce into desirable, beautiful, easy-to-cook food.

Financial and Fundraising Details

Current Annual Budget: N/A

Org Type: For-profit

Ask Amount: USD 7M

Timeline: November 2022

Maturity Stage: Growth Stage

Product Stage: Currently Selling

Use of Funds: Increase their capacity and scale up the production line.

Capital Type: Equity

Salt Lake City, UT • Founded: 2019 • Time on Report: 9 Months
Contact: Shawn Peterson, Executive Director & Founding Member, Shawn@gleaners.us

[The Association of Gleaning Organizations](#) (AGO) builds the capacity of organizations recovering fresh fruits and vegetables from farms, gardens, and backyards across North America. The majority of the organizations they serve are small, primarily organic, farms. By engaging communities to harvest surplus produce, vulnerable populations are provided with increased access to wholesome foods. Their programs work with local gleaning organizations to increase their capacity, share resources and knowledge, and collaborate regularly to increase collective impact. From an Annual Symposium to guiding someone through setting up their 501c3 status, they not only support the gleaning movement, but also drive it.

Financial and Fundraising Details

Current Annual Budget: USD 0.15M

Org Type: Nonprofit

Ask Amount: USD 0.2M

Timeline: December 2022

Use of Funds: Supporting 2022 programming, supporting gleaning orgs with transitioning leadership, moving from a volunteer staff to a paid staff, grant writing, and building out volunteer programs.

Capital Type: Grants / Donations

Knoxville TN • Founded: 2018 • Time on Report: 4 Months
Contact: Johan larsen, Co founder and, johanlarsen@fieldandyield.com

[Field & Yield](#) built and validated a new tech platform capable of helping the food system (e.g food distributors) to funnel oversupply towards helping organizations in a way where they recover otherwise lost revenue and reduce waste.

Financial and Fundraising Details

Current Annual Revenue: USD 0M

Org Type: For-profit

Ask Amount: USD 6.5M

Timeline: Q3 2022

Maturity Stage: Early Stage

Product Stage: Prototype

Use of Funds: Use their current data and measured outcomes and hire key people and begin onboarding buyers and sellers to get them to PMF

Capital Type: Equity, Convertible debt, Venture debt, Senior and subordinated debt, PRIs, Grants / Donations, Guarantees / letters of credit, Project equity, Project debt

North Hollywood, CA • Founded: 2009 • Time on Report: 10 Months
Contact: Jen Cox, Chief Development Officer, jen@foodforward.org

[Food Forward](#) is an innovative food recovery organization working to fight hunger, share abundance, and prevent food waste in Southern California and beyond. Since its founding in 2009, Food Forward has recovered and distributed more than 250 million pounds of fresh produce and prevented emissions of over 222,500 metric tons of CO2 equivalent from food that would otherwise be sent to landfills. Food Forward's focus on the high-volume redistribution of fresh produce is an efficient method to reformat the system of surplus so that it helps their community, rather than hurting the environment.

Financial and Fundraising Details

Current Annual Budget: USD 5.7M

Org Type: Nonprofit

Ask Amount: USD 1M

Timeline: December 2022

Use of Funds: Support will help Food Forward to deliver critical services, meeting the need for nutritious food and furthering health equity in the region. Their largest expenses are logistics and fruit and vegetable transportation costs.

Capital Type: Grants / Donations

Albuquerque, NM • Founded: 2014 • Time on Report: 3 Months

Contact: Trista Teeter, Managing Director, trista@fifabq.org

[Food is Free Albuquerque \(FIFABQ\)](#) strives to create a bridge between abundant local resources and community members in need of produce. An estimated 1+ million pounds of produce go to waste in the backyards of Greater Albuquerque residents each year. Through gleaning and various community empowerment projects, FIFABQ offers an inclusive environment full of education rooted in a humanistic approach. While currently based in Albuquerque, FIFABQ plans to create a replicable and sustainable practice to implement throughout the state utilizing their mindful distribution network.

Financial and Fundraising Details

Current Annual Budget: USD 0.1M

Org Type: Nonprofit

Ask Amount: USD 0.1M

Timeline: December 2022

Use of Funds: Since the product (produce) is free, the primary cost is organizational support. It is estimated that for every \$10k invested into Lead Harvesters, an additional 20,000 pounds can be gleaned.

Capital Type: Grants / Donations

Providence, RI • Founded: 2018 • Time on Report: 10 Months

Contact: Eva Agudelo, Founder and Executive Director, eva@hopesharvest.org

[Hope's Harvest RI](#) mobilizes volunteers to rescue surplus food from farms for distribution to hunger relief agencies. Their mission is to improve the livelihoods of local farmers, increase food security for their most vulnerable residents, and get everyone engaged in strengthening the food system by eliminating on-farm food waste in Rhode Island. They accomplish this mission through gleaning, surplus purchasing, and food system leadership. Their program increases healthy food access for over 35,000 unique individuals per month, via partnerships with 30+ farms and 35+ hunger relief agencies.

Financial and Fundraising Details

Current Annual Budget: USD 0.4M

Org Type: Nonprofit

Ask Amount: USD 1.1M

Timeline: December 2022

Use of Funds: Total program funding for Hope's Harvest of \$1.1M over the next three years would put \$550K directly in hands of RI farmers while delivering 1.2 million pounds of fresh produce

Capital Type: Grants / Donations

Orlando, FL • Founded: 2018 • Time on Report: 4 Months

[IoT Logistics](#) implements emerging technology; their focus is on RFID and IoT sensor tracking to allow for supply chain optimization, reducing spoilage and overstockage. They have a specific project to implement - VaaSS. Vegetables as a Self Service is a prototype that reduces the supply chain of fresh fruits and vegetables to zero, while alleviating food deserts and urban underserved communities; it is vertical, hydroponic greenhouse vegetable and fruit gardening at a community level. Rather than go to your grocery store to buy fruits and veggies - which are expensive/unavailable in food deserts - the community can go to their local VaaSS outlet and pick their fresh veggie/fruit basket for the day. Pitch deck for VaaSS (minted as an NFT) [here](#).

East Cleveland, OH • Founded: 2020 • Time on Report: 1 Month
Contact: Ismail Samad, Founder, Ismail@loiter.us

[Loiter](#) is a nonprofit 501(c)(3) organization and sits at the intersection of racial, economic, and environmental justice. It aims to develop a local, closed-loop food economy that builds power among the people of East Cleveland. Loiter has purchased a 10 year old agribusiness as a strategic investment to be the linchpin community wealth building asset. Loiter will tap into 3 major areas to deploy East Cleveland's existing resources and take advantage of market opportunities—community-based agriculture, home food preparation, community composting, and food business startup. Their expansion to East Cleveland will bring home owner farming opportunities directly to residents, combating the reality of intentional disinvestment. They hope to illustrate what an intentional, community-based, closed loop food system can look like, working with partners within and outside of the city to create alternatives to the current system of corporate food production.

Jacksonville, FL • Founded: 1999 • Time on Report: 3 Months
Contact: Joanne Hickox, Pioneer, Joanne@SeniorsonaMission.org

[Seniors on a Mission, Inc.](#) (SoaM) intends to build an agri-village (G3 village) for independent living, middle-income, over 55 adults that reduces food waste by shaping the new senior living community environment from the ground up. Every ounce of food and vegetation would be used first by humans, then animals, then composted to enable nutrient dense fertilizing for more planting. The USA has a major housing shortage for seniors. New places are being thrown up as fast as they can with as many possible units per square foot. Most of these HUD units have little green space and tons of waste. SoaM is creating an agri-village for middle-income older adults where part of their rent is due in sweat-equity. They will help grow their own food, raise their own meat and cheese and cook and serve meals for their entire community. SoaM has worked with older adults for 22 years and has recognized the overwhelming waste of food by living alone. Food sharing between humans with leftovers or unusable vegetation going to livestock reshapes the consumer environment.

Financial and Fundraising Details

Current Annual Budget: USD 0.3M

Org Type: Nonprofit

Ask Amount: USD 0.2M

Timeline: November 2022

Use of Funds: SoaM will work with international agricultural experts to design the process that eliminates all waste for 200 people living in a senior living village concept. DRAWINGS & 3D Renderings: Architectural drawings, plant data baseline, land data table and all ecological research, VR of architectural drawings.

Capital Type: Grants / Donations

Big Island, VA • Founded: 1979 • Time on Report: 6 Months
Contact: Lynette Johnson, Executive Director, lynette@endhunger.org

[The Society of St. Andrew](#) reduces food waste upstream at the farm level and pre-production/packing house level, working across multiple states. They currently keep 25-30 million pounds of food each year out of the waste stream, through gleaning, farm or packing house pickups, larger scale produce salvage, and field or orchard stripping gleaning after all commercial harvest is complete. This food is shared through their network of feeding agency partners often within 24 hours of harvest. Their goal is to make it as easy and as cost effective for growers to donate their excess and unmarketable table crops as it would be for them to till them under or haul them off-site for dumping. Their proprietary database provides traceability of product from farm to feeding agencies, and they provide year-end itemized charitable donation receipts to providers.

Financial and Fundraising Details

Current Annual Budget: USD 18-40M

Org Type: Nonprofit

Ask Amount: USD 17M

Timeline: March 2025

Use of Funds: Expansion into 8 new states (\$750,000 per state). The additional \$11 million will grow their endowment, which will support additional states' expansion and programmatic growth.

rita@uprootcolorado.org / dave@uprootcolorado.org

[UpRoot Colorado](#) (UpRoot) increases the nutritional security of Coloradans by harvesting and redistributing surplus, nutrient-dense foods while supporting the resilience of farmers. It is estimated that more than 500 million pounds of food remains unharvested and unsold annually on Colorado farms. They are working to increase the amount of surplus, nutrient-rich (i.e., protective) foods that they can recover and divert into Colorado's hunger-relief system via their gleaning initiative (they currently rescue food in 10 of Colorado's 64 counties). Secondly, based on their farm & food mobile workforce pilot (2018-2021) that offered Colorado producers on-demand, supplemental and efficient labor, they are working to transition the pilot into a worker-owned agricultural-services cooperative to help producers to harvest and sell more of what they grow.

Food Waste
Funder Circle

Sao Paulo, Brazil • Founded: 2021 • Time on Report: 3 Months
Contact: Luciano Kleiman, Co-Founder, luciano.kleiman@b4waste.com.br

[B4Waste](#) is a Brazilian food-tech company changing how Brazilians deal with food waste. It helps retailers sell products close to expiration date directly to consumers with a discount of at least 50%, creating a win-win situation for retailers (who sell products that would otherwise be disposed of) and consumers (who can acquire goods at a discounted price). B4Waste does that through an app in which retailers can list their available products to consumers (both individuals and organizations like restaurants or low income purchasing associations). As the goods sold by B4waste would normally be discarded, the platform prevents waste creation and its emissions of methane and carbon. Expected Outcomes: Avoid 11,000 tons of food going to landfills; 944 tones of methane are not released into the atmosphere and \$15M saved for consumers.

Financial and Fundraising Details

Current Annual Revenue: USD 0.5M

[Mobius](#) is a team of molecular upcyclers modernizing how industries deal with plant-based processing byproducts, and they are on a mission to *Create a World Where #TheresWonderInWaste*. They believe that unavoidable food and forestry processing waste can be separated into highly valuable sugars, fats, fibers, proteins, phenolics, and other small "vitamin" molecules. Their technology platform will be able to turn these byproducts into upcycled ingredients, chemical building-blocks, and biodegradable materials. Food processors can partner with them to earn money, save time and labor, and reduce their waste output. Sustainable brands can buy their waste-based ingredients to reduce their carbon footprints, decrease land-use intensity, and meet supply challenges and their customers' demands for more circular and sustainable products.

[Acterra](#) is a San Francisco Bay Area nonprofit that brings people together to create local solutions for a healthy planet. Food waste prevention is promoted through their Healthy Plate, Healthy Planet & Climate Friendly Kitchens programs. They provide education and consultations on better food storage techniques, expanding cooking capabilities, recipe development, utilizing all parts of produce, shopping strategies, etc. Their HomeGrown Bay Area Coalition's vision for 2030 is that all local governments in the SF Bay Area have committed to policy, purchasing and programming that ensures: Good Food for ALL, Local & Sustainable Farming Practices, Fair Working Conditions, and Zero Food Waste. Acterra's You(th) Be the Change program provides a climate change curriculum, training, and instruction for middle/high schools. The curriculum emphasizes food systems, and includes review of food waste data, sources, and prevention methods. Students gauge how much food is wasted at their schools. They have developed models in collaboration with Stanford University using current research on activity specific greenhouse gas emissions. These models are used to assess their impact using program data including event attendance, estimated conversion rates, pre/post survey responses and kitchen waste weights.

Portland, OR • Founded: 2014 • Time on Report: 4 Months
Contact: Camas Davis, Executive Director, camas@goodmeatproject.org

[Good Meat Project](#) is a national nonprofit with the mission to build pathways toward responsible meat production and consumption. They envision a thoughtful, conscientious culture of meat consumption that supports an ecologically sound, economical system of meat production with the capacity to improve the environment and the lives of animals and people. They share knowledge, build coalitions, and empower change makers all along the meat supply chain, with a focus on consumer education campaigns that are collaborations between Good Meat producers, brands, and businesses, and their network of writers, designers, and other experts. In a recent survey, their network of Good Meat farmers/ranchers identified selling to a consumer base that doesn't feel confident cooking most cuts of meat as a top sales challenge; this leads to food waste at home, and results in disposal of surplus product in retail and restaurant settings. To address this, they seek to expand their Good Meat Breakdown program, an online resource that helps eaters find, buy, and cook Good Meat. This expansion would include a recipe database, a video series, and a national campaign that promotes nose-to-tail eating and, thus, reduces food waste among consumers and retailers who buy Good Meat.

Nashua, NH • Founded: 2016 • Time on Report: 4 Months

Contact: Paul Karpawich, Steward of Ecological Engagement, paul@grownashua.org

[Grow Nashua](#) collectively shifts residents from “Food Consumers” to “Food Producers” through programming and messaging to reinforce total community care in the urban permaculture and the waste diversion space. They focus on food waste in New Hampshire (NH) K – 12 schools. The NH Biennial Solid Waste Report stipulates that by 2025, NH will start to run out of existing landfill space to dispose of trash and have an overflow of 120,000 tons per year. The goal is to put in place a long- term food waste diversion system in K-12 NH schools that empowers students, faculty, administrators and policy makers to take action, including managing and weighing the amount of food waste created and diverting the waste through regenerative methods including composting and anaerobic digesters. By having students sort and weigh the food waste, they begin to see what they are throwing away and can conduct audits and connect the natural resources tied to wasting food. [Link to grant.](#)

AmpleHarvest.org has a food waste program called [Faith Fights Food Waste](#) explicitly for the faith community. Although AmpleHarvest.org itself is not a faith based program, the reality is that as 70% of food pantries are based in a house of worship, engaging the faith community to help leaders do sermons on the waste of food is the ideal way to scale awareness to the nation's 88M people of faith. The program provides the opportunity to guide and inspire their followers to reduce the waste of food based on their own faith values and scriptures. The program explains the issue of the waste of food to clergy using ReFED and other resources, then provides a sermon written in their own faith tradition and language, calls to action, and a game show for the religious school. The intent is to enable the clergy to fold food waste into their sermons on feeding the hungry. Their "ask" for financial support is to reach all 300K faith leaders in the US by way of emails, mail, and social media.

Financial and Fundraising Details

Current Annual Budget: USD 0.5M

Org Type: Nonprofit

Ask Amount: USD 0.5M

Timeline: December 2022

Use of Funds: The funding would be used both to expand awareness to 300K clergy - who would then preach to 88M congregants.

[Arizona Food Bank](#) (AzFBN)'s mission is to develop solutions to end hunger through food banking, public policy, and innovation. As they take on expanded operations that further efforts to end hunger while simultaneously preventing food waste, AzFBN is eager to learn more and explore opportunities that can amplify their work in both areas. Since 1984, AzFBN has worked to support food banks, educate the public and policymakers about food insecurity in Arizona, and innovate with programs geared toward preventing more people from poverty and food insecurity. They do this by rescuing fresh produce—both on-farm waste and more that would otherwise be headed for the landfill—and by supporting transportation of food, most of which is donated fruits and vegetables, through a statewide network of food banks and agency partners. Through the No Borders, No Limits Produce Program, they are dedicated to addressing food waste and food insecurity in Arizona, nationwide, and in Mexico.

South Bend, IN • Founded: 2016 • Time on Report: 3 Months

Contact: *Lainie Holland, Director of Planning and Programming, lainieh@cultivateculinary.com*

[Cultivate Culinary School & Catering](#)'s program Cultivate Food Rescue is a nonprofit organization located in South Bend, Indiana and their unique model meets two mounting needs: food waste and hunger. By rescuing food, they can feed hungry people in their community with a well-balanced meal that helps protect the environment. Their model consolidates the supply and matches the recovered food to the needs of each of the agencies that they serve. Cultivate collects food donations from several sources, such as grocery stores, restaurants, or catering services. They then redistribute the perishable food and create meals from the non-perishable food.

Financial and Fundraising Details

Current Annual Budget: USD 3.5M

Org Type: Nonprofit

Ask Amount: USD 2.8M

Timeline: December 2024

Use of Funds: Their goal is to double their output of food in the next three years by adding on significantly to their building. They are seeking funding to build a 12,000 square foot cold storage facility, which will be used to expand their capacity, and will also be made available to our agency partners at no cost.

Denver, CO • Founded: 2014 • Time on Report: 10 Months

Contact: *Jamie Anderson, Program Director, jamie@denverfoodrescue.org*

[Denver Food Rescue](#) is producing health equity with Denver neighborhoods through No Cost Grocery Programs and home delivery of fresh food. With the help of volunteers, the rescued food is delivered, often by bike, to Denver neighborhoods for direct distribution at No Cost Grocery Programs (NCGPs). NCGPs are co-created with existing community organizations like schools, recreation centers, and nonprofits that are already established and trusted within the neighborhood, decreasing transportation barriers. Residents of the NCGP community lead the distribution of rescued food, and many also help with food rescue shifts. This participation decreases stigma of traditional food pantries, empowering each neighborhood to create a program that is appropriate for their culture & community.

Capital Type: Grants / Donations

New York City, NY • Founded: 2017 • Time on Report: 7 Month
Contact: *Yalda Nikoomanesh, Executive Director, yaldan@rethinkfood.org*

Rethink Food started by transforming excess food from restaurants, corporate kitchens, and grocery stores into meals for communities facing food insecurity. In 2020, Rethink launched Rethink Certified (RTC), which partners with restaurants to prepare meals for communities facing food insecurity. In exchange, they provided grants to support food, operating, and staffing costs. They now operate in San Francisco, Chicago, Nashville, Washington D.C and Miami. Rethink also operates a commissary kitchen in Manhattan, which converts donated and excess food items from restaurants, hospitality institutions, food suppliers and grocery stores into nutrient-dense meals to deliver to CBOs at no cost. In 2021, Rethink diverted nearly 500,000 lbs of excess and/or donated food from landfills. Since its inception, Rethink has provided nearly 7 million meals to communities facing food insecurity and invested nearly \$30 million to support small businesses.

Financial and Fundraising Details

Current Annual Budget: USD 19M

Org Type: Nonprofit

Ask Amount: USD 1.3M

Timeline: December 2022

Use of Funds: Expand network, increase capacity, pilot and test a "Rethink Certified Campus" model, pilot a new service model with sustainability focused commercial waste companies, and expand and "green" their trucking operations

Capital Type: Grants / Donations

Brewster, NY • Founded: 2016 • Time on Report: 5 Months
Contact: Martha Elder, Executive Director, martha@secondchancefoods.org

[Second Chance Foods](#) works to restore dignity, provide true nourishment, ensure food justice and build community in hunger relief. They are deeply concerned about global sustainability and work to mitigate food waste, localize the food system, and responsibly handle non-edible food and packaging through feeding animals, composting and recycling. They are a Putnam County, NY-based food rescue organization whose innovative model connects the fresh, healthy, available food in the area to people who need assistance - before it goes to waste.

Financial and Fundraising Details

Current Annual Budget: USD 0.2M

Org Type: Nonprofit

Ask Amount: USD 0.2M

Timeline: December 2022

Use of Funds: Additional funding will allow them to continue expanding reach. Demand for their prepared meals and fresh groceries currently outstrips their ability to meet the needs of everyone requesting help. Increased funding will support hiring staff to train volunteers, produce meals, transport, and buy supplies.

Capital Type: Grants / Donations

Philadelphia, PA • Founded: 2018 • Time on Report: 7 Months
Contact: Evan Ehlers, Founder/Executive Director, evan@sharingexcess.com

[Sharing Excess](#) partners with grocery stores, restaurants, wholesalers, and farmers to deliver surplus food to a network of nonprofits, food banks, and community organizations to alleviate local food insecurity. Sharing Excess originally started as a movement of college students at Drexel University addressing food insecurity on campus and in the surrounding community of West Philadelphia. Over the next few years, Sharing Excess moved outside of universities and began rescuing and delivering food from small and large food providers of the greater Philadelphia area. Currently, SE is a network of over 185 grocers, restaurants, farmers, and wholesalers - contributing over 100,000 lbs of food to Philadelphia communities every week. Since 2018, Sharing Excess has rescued nearly 7 million pounds of food.

Financial and Fundraising Details

Current Annual Budget: USD 0.67M

Org Type: Nonprofit

Ask Amount: USD 2M

Timeline: June 2023

Use of Funds: Scale their model to New York, Boston, Austin, Denver, and San Diego markets. Their goal is to establish self sustaining "Phase 1" networks that are each able to rescue and deliver one million pounds of food annually. They will need to provide each city with food rescue vehicles, training, equipment (electronic scales), storage space, personnel (including drivers and coordinators), supplies & merchandise, and technology maintenance. They estimate the starting cost for each city at \$250,000.

Capital Type: Grants / Donations

Melrose, MA • Founded: 2020 • Time on Report: 4 Months
Contact: Jana Gimenez, Executive Director, fooddrivemelrose@gmail.com

[The Food Drive](#) is a community-driven food rescue nonprofit that provides hands-on, hyperlocal solutions to food insecurity and food waste. They match rescued food with the specific dietary and cultural needs of their recipients. Their particular focus is providing fresh, nutritious, perishable food that is vital for good health, and is often prohibitively expensive and in short supply at food pantries. Founded in November 2020 as an immediate response to COVID-19 and, more recently, inflation, The Food Drive serves communities north of Boston, Massachusetts. Their recipients include food pantries, soup kitchens, shelters, senior centers and teen centers, community meal programs, low-income and permanent subsidized housing residences, and individuals with immediate needs. In addition to food rescue, their activities include a Community Freezer to fill immediate needs with healthy frozen meals, Community Donation Bins to mobilize ongoing collection of nonperishable food, Neighborhood Food Drives to meet specific requests from local pantries, and a Post Graduate Program to provide volunteer opportunities for special-education students ages 18-22.

Financial and Fundraising Details

Current Annual Budget: 0.65M

Org Type: Nonprofit

Ask Amount: USD 0.8M

Timeline: December 2022

Use of Funds: Funds will support the program costs for food rescue and food access activities.

Capital Type: Grants / Donations

[UC Merced in partnership with Community Initiatives for Collective Impact](#) launched the Bobcat Eats Food Waste Awareness and Prevention Program in an effort to reduce food waste at the food bank and to feed our community. The program worked to set up new food distribution sites in the County and to help the Food Bank implement best practices to reduce food waste, and it led to the creation of No Food Left Behind, a free text messaging service at UC Merced that connects the UC Merced Community to events that might have food leftover.

Financial and Fundraising Details

Capital Type: Grants / Donations

Pleasant Hill, CA • Founded: 2013 • Time on Report: 6 Months
Contact: Eve Birge, Executive Director, evebirge@whiteponyexpress.org

[White Pony Express](#) serves 120,000 people each year by partnering with more than 80 vetted agencies who have strong ties to the community. Since their inception, WPE has rescued and delivered more than 18 million pounds of nutritious food and prevented more than 14,250 tons of CO2 emissions from entering the air we breathe. The food rescue program at White Pony Express (WPE) has expanded the food rescue model by subjecting all collected food to a meticulous culling process and promising that the rescued food is obtained, sorted, and redistributed within a twenty-four-hour time period—seven days a week. They do not ‘bank’ their food; it is fresh and often organic fruits and veggies, dairy, eggs, meats, and bakery goods. WPE’s sustainable model has already been replicated in several cities and their goal is to help others create similar organizations. They are a growing but lean organization that is reliant upon the generosity of its corporate, community, and governmental donors.

Brooklyn, NY • Founded: 2021 • Time on Report: 1 Month
Contact: Daisy Conroy, Co-CEO, Co-Founder, daisy@hodge.earth

[Hodge](#) scales the collection of source-separated organics with the first transparent, human-centered waste service catered to city systems. They offer food-waste collection for commercial businesses, and couple this service with processing in-city and on regional farms as a fully-integrated supply chain. They've developed a modular system to challenge the traditional, centralized "compost site" and explore a distributed, farmer inclusive model with diverse products produced. They collect accurate data on food waste, pre-treat the material in-city, assess quality + microbial content for future fertilizer applications, and transport to partner farms—all while converting data into climate metrics.

Financial and Fundraising Details

Current Annual Revenue: USD 0.07M

Org Type: For-profit

Ask Amount: USD 5M

Timeline: November 2022

Maturity Stage: Pre-seed / Seed Stage

Product Stage: Currently Selling

Use of Funds: \$1.5M will scale collections including updating tech stack, hiring, and operations, taking them to a break-even point for this revenue source. The remaining \$3.5M will expand go-to-market testing for liquid amendment, and expand farm-site processing.

Capital Type: Equity, Convertible debt, Venture debt, Grants / Donations, Project equity, Project debt

Washington D.C. • Founded: 2017 • Time on Report: Just Added
Contact: Jeffrey Neal, CEO and Founder, Jeffrey@loopclosing.com

[Loop Closing](#) disrupts the \$11B food waste hauling industry by deploying a network of food waste composting machines engineered for on-site use. They save clients money while providing composting capacity; remediating smells, spills, and pests; reversing climate chaos; generating green-skilled jobs; and dismantling structural inequities for regenerating our soils, communities, and the environment. Their distributed solution addresses the costs, difficulty, and restrictions of our current centralized food waste system by deploying a robustly supported network of composting machines placed next to or replacing dumpsters at food waste generation sites like restaurants. They use the compost locally or bring it to farms on food delivery vehicles.
[Financial and Fundraising Details](#)

Capital Type: Senior and subordinated debt, Project debt

Lima, Peru • Founded: 2016 • Time on Report: Just Added
Contact: Pipo Reiser, CEO, pipo@sinba.pe

[Sinba](#) is a social enterprise and Certified B Corp, whose purpose is to work for a #sinbasura (without waste) world, where nothing is left over, and no one is left out. They provide a sustainable waste management service for companies and households that allows customers to recycle 100% of organic and inorganic recyclable materials in collaboration with formal recyclers through a socially inclusive model. Organics are processed into animal feed and fertilizer, while inorganics are recovered as raw materials for local industries. They manage to reduce waste and associated pollution by up to 90%, strengthening local economies and generating impact.

Financial and Fundraising Details

Current Annual Revenue: USD 0.75M

Org Type: For-profit

Ask Amount: USD 1.5M

Timeline: August 2023

Maturity Stage: Early Stage

Product Stage: Currently selling

Use of Funds: They currently operate a "sinba node" in south Lima, where they can process and recycle 80 tons of organic waste (mainly from food businesses) and 10 tons of inorganic recyclables per day. They are raising funds to open a new plant in north Lima to double their food waste recovery capacity.

Capital Type: Equity, Convertible debt, Venture debt, Grants / Donations

San Diego, CA • Founded: 1983 • Time on Report: 1 Month
Contact: Jessica Toth, Executive Director, jessica.toth@solanacenter.org

[Solana Center for Environmental Innovation](#) is widely recognized for delivering lasting novel environmental solutions. Regarding Food Waste Recycling, they showcase the feasibility of region-wide closed loop capability through partnerships between government, food-sellers, and agricultural producers. All their food recycling initiatives quantify financial and GHG impacts. Examples of models designed for widespread replication include: Demonstration use of bokashi for compost pre-processing RESULTING IN common use of bokashi as a solution for retarding food waste putrefaction; On-farm composting of restaurant food scrap producing cheaper and richer natural soil amendment RESULTING IN County ordinance to permit farm-to-business-to-farm pathways for food waste; Creation of the first mid-scale composting demonstration center and training curriculum RESULTING IN over 100 practitioners with skills to manage composting systems larger than residential and smaller than commercial.

Financial and Fundraising Details

Current Annual Revenue: USD 1M

Org Type: Nonprofit

Ask Amount: USD 0.25M

Timeline: Spring 2023

Use of Funds: They aim to close a gap in anaerobic digestion solutions being adopted across the country to manage food waste. There is a broken link in AD's sustainability story. After biogas is extracted, AD operators are left with digestate, amounting to up to 95% of feedstock volume. Using impact-first funding, Solana Center will establish composting on local closed landfill sites using digestate. Today, AD facilities incur the costs of transporting and disposing digestate. Meanwhile, closed landfills are often inaccessible valuable land. Benefits of composting and land-applying digestate on closed landfills include cost savings, GHG avoided and sequestered, and regained access to community land.

Appendix A: ReFED's Key Action Area Framework

Action Areas  OPTIMIZE THE HARVEST Avoid over-production, then harvest as much as possible. For wild caught products, source only what is needed.  ENHANCE PRODUCT DISTRIBUTION Leverage technology to create smart systems that help efficiently move products to maximize freshness and selling time.  REFINE PRODUCT MANAGEMENT Align purchases with sales as closely as possible and find secondary outlets for surplus. Build out systems and processes for optimal on-site handling.  MAXIMIZE PRODUCT UTILIZATION Design facilities, operations, and menus to use as much of each product as possible. Upcycle surplus and byproducts into food products.  RESHAPE CONSUMER ENVIRONMENTS Drive consumers towards better food management and less waste by creating shopping, cooking, and eating environments that promote those behaviors. Shift culture to place more value on food and reduce waste.  STRENGTHEN FOOD RESCUE Further the rescue of high-quality, nutritious food by increasing capacity, addressing bottlenecks, and improving communication flow.  RECYCLE ANYTHING REMAINING Find the highest and best use for any remaining food or food scraps in order to capture nutrients, energy, or other residual value.
