EPA

U.S. Goal to Reduce Food Loss and Waste by 50% by 2030

EPA has aligned its baseline and goal for food waste with the SDG Target 12.3 food waste index and EPA's food recovery hierarchy to encourage prevention and keep food in the human food supply chain.

What are we aiming to cut in half by 2030?

- Retail, food service, and household food waste that is being sent to orange and red destinations.

[Graphic: Champions 12.3](#)

Farm-to-Kitchen Environmental Footprint of U.S. Food Loss and Waste

(excluding impacts of waste management,
such as landfill methane emissions)

GHG emissions of
42 coal-fired power plants

Enough water and energy to supply
more than **50 million homes**

The amount of fertilizer used
to grow **all plant-based foods**

An area of agricultural land
equal to **California and New York**
